

Underground Injection Control Decision Points
Vulcan Materials Company - Class I Wells

September 9, 1985

The Underground Injection Control (UIC) program has been delegated to Kansas. Any determinations concerning the Class I well permits will be made by the Kansas Department of Health and Environment (KDHE). KDHE committed in the State/EPA Agreement to complete repermitting all Class I wells in FY-86. Otherwise, the State has until December 1988 to meet regulatory requirements to repermit Class I wells.

Decision points that have been determined include:

1. A public hearing on the UIC draft permit was held on July 17, 1985.
2. EPA, Region VII, comments on the draft permit were mailed to Mrs. Barbara Sabol on August 26, 1985.
3. Reply from KDHE on EPA's draft permit comments. No date set.
4. KDHE's decision to approve or deny the UIC Class I permit. No date set as yet.
